Dear Terri,

I wanted to take a moment to thank you for your help with our new website. I had postponed updating our dreary, outdated site because the task seemed daunting. I interviewed other providers, but didn't feel confident after speaking with them. After our initial phone call I felt the weight of the website off my shoulders. Your research, design, copy, and suggestions proved to be invaluable. You were careful not to lose a single moment switching sites and not even one email was lost in the transition. In the past year you have always been available to answer questions, update our site and even helped with a print ad I needed in a pinch.

I've asked all my clients for feedback and really felt good about the warm response I received. I always recommend you to all who will listen.

As the business grows you continue to help us and I am grateful to have you as part of our team.

Sincerely,

Lauren Locker, CFP
